# Mykola Rudnev, Front-End Developer

Lublin, Poland, 790240418, rudnevmykola@gmail.com

---

## Work Experience

---

Sep 2020 - Present     Javascript Developer, For Better Future Software House          Lublin

**Confidential Project for Major Tobacco Company (4 Online Stores)**

**Summary:** As a front-end developer, played a pivotal role in creating four distinct e-commerce platforms for a global tobacco company. Responsibilities included developing and optimizing product pages, checkout flows, user account areas, and ensuring full mobile responsiveness.

**Key Achievements:**

- **Tailored** themes for each market, aligning with regional requirements.
- **Enhanced** platform performance, leading to faster load times and improved user experience.

**Technologies:** Magento 2, JavaScript, XML, Docker, jQuery, Hyvä, REST API, Less.

**PMI Careers**

**Summary:** Developed a recruitment website using React.js, later migrating to Next.js for enhanced performance and scalability. Managed all pages, created custom elements, and supported the migration process.

**Technologies:** JavaScript, TypeScript, React.js, Next.js, StyledComponents, REST API, Less.

**Link:** https://pmicareers.pl/

**Internorm**

**Summary:** Built a company website for a PVC manufacturer using WordPress, TypeScript, and Gatsby.js. Handled all pages and developed custom elements to meet client specifications.

**Technologies:** WordPress, TypeScript, Gatsby.js, JavaScript, StyledComponents, GraphQL.

**Link:** https://www.okna-pasywne.pl/

**HRK**

**Summary:** Engineered a scalable recruitment website using TypeScript and Gatsby.js. Implemented SEO strategies that improved organic search traffic by 50%, significantly increasing candidate inquiries within three months.

**Technologies:** WordPress, TypeScript, Gatsby.js, JavaScript, StyledComponents , GraphQL.

**Link:** https://www.hrk.pl/

**Carneoo**

**Summary:** Finalized a Next.js website for a car company, focusing on bug resolution, major page development, and custom elements to boost user engagement.

**Technologies:** JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, REST API.

**Link:** https://carneoo.de/

**LearningSpace**

**Summary:** Developed an educational platform from scratch using React.js and Next.js, creating a dynamic and interactive learning experience.

**Technologies:** JavaScript, TypeScript, React.js, Next.js, REST API.

**Link:** https://learningspace.app/

**Novum Klinika**

**Summary:** Assisted in completing a healthcare website by implementing responsive design, refining UI components, and ensuring smooth functionality across devices.

**Technologies:** JavaScript, React.js, Next.js, Tailwind CSS, Storybook, REST API.

**Link:** https://www.novum.com.pl/

**3MK Protection**

**Summary:** Developed a Magento 2 store with a custom theme and specialized features. Focused on building the homepage, category, and cart pages, along with CMS static pages and custom functionalities.

**Technologies:** Magento 2, JavaScript, XML, jQuery, Docker, REST API, Less.

**Link:** https://3mk.pl/

**Catering24**

**Summary:** Supported the development of a Magento 2 store with custom design and features. Contributed to the homepage, category pages, CMS static pages, account sections, and custom elements for enhanced usability.

**Technologies:** Magento 2, JavaScript, XML, jQuery, Docker, REST API, Less.

**Link:** https://www.catering24.co.uk/

**Paypair**

**Summary:** Improved an existing Magento 2 store by resolving bugs, introducing new features, and adding custom elements to enhance functionality and user experience.

**Technologies:** Magento 2, JavaScript, XML, jQuery, Docker, REST API, Less.

**Link:** https://paypair.com/

**Solar**

**Summary:** Contributed to a custom-themed Magento 2 store with advanced functionalities, working on major pages and integrating custom elements for a seamless user experience.

**Technologies:** Magento 2, JavaScript, XML, jQuery, Docker, REST API, Less.

**Link:** https://www.solar.com.pl/

**HouseTipster**

**Summary:** Created a Magento 2 e-commerce store from scratch with a custom theme and advanced features. Managed the homepage, category, product, and CMS static pages, as well as user account sections and unique custom elements.

**Technologies:** Magento 2, JavaScript, XML, jQuery, Docker, REST API, Less.

**Link:** https://housetipster.com/

**Edycja**

**Summary:** Built a Magento 2 store from the ground up, collaborating on custom theme development, covering all pages, and integrating advanced custom elements.

**Technologies:** Magento 2, JavaScript, XML, jQuery, Docker, REST API, Sass.

**Link:** https://edycja.pl/

**Additional Projects**

Contributed to various smaller projects in Magento and React.js/Next.js, enhancing skills in e-commerce development, custom

theme creation, and front-end technologies.

Jan 2020 - Apr 2020   Frontend Developer, ORBA                                                                                                Lublin

Worked as a junior front-end developer on an e-commerce website for the cosmetics industry, specializing in Magento 2. Focused on using key Magento 2 capabilities to improve site performance and user experience.
